---

## SUMMARY

---

Enthusiastic and dedicated BTech student with a passion for learning and technology. A quick learner with a strong ability to grasp new concepts and apply them effectively. Enjoys working in a team environment, actively engaging with group members to collaborate and solve problems efficiently. Eager to gain hands-on experience and expand knowledge in web development and related fields..

---

## EDUCATION

---

- **Gandhi Institute of Technology and Management** (8.38 cgpa) Bengaluru | 2024-2027  
Bachelor of Science, Computer Science
- **Sri Narayana pu collage** Bellary | 2021-2023  
CBSE PUC 1,2
- **Relevant Coursework:** Web Development, Python , C++ , C, Matlab,Java.

---

## TECHNICAL SKILLS

---

- **Programming Languages** Python, C, C++,Java.
- **Web Development** HTML, CSS, JavaScript,MongoDB,NodeJS,ExpressJS,RestApi,Typescript.

---

## PROJECTS

---

### UPI QR Payment System (Full Stack Project)

feb 2026 – mar 2025

- Developed a real-world payment solution for small businesses to handle multiple UPI accounts efficiently.
- Built a web application that allows shop owners to add multiple payment accounts and generate QR codes with predefined amounts.
- Eliminated manual payment entry errors by enabling customers to scan QR codes and pay the exact amount automatically.
- Reference: <https://upi-pink.vercel.app/>

### Simon Says Game (JavaScript)

Sep 2024 – Oct 2024

- Developed a browser-based Simon Says game using JavaScript.
- Implemented game logic for pattern generation and user input validation for interactive gamep
- HTML | CSS | JavaScript.
- Reference: <https://github.com/Prathap-bs/symonsaysgame.git>

### Travel and Tour Website (WordPress)

Oct 2024 – Nov 2024

- Built a fully functional travel and tour website using WordPress.
- Designed a responsive interface with user-friendly navigation for an improved browsing experience.
- WordPress.
- Reference: <https://tourandtravel8819.wordpress.com/prathap/>

### AI-Powered Gesture Detection for Emergency Response

Nov 2024 – Apr 2025

- The entire project was AI-generated, with minimal manual intervention for updates and UI adjustments.
- Built a full-stack AI-based hand gesture detection system focused on emergency signals, using React, TypeScript, OpenCV, and MediaPipe.
- Implemented real-time V-sign recognition with 93% accuracy and <50ms latency using landmark-based detection and gesture stabilization algorithms.
- Enabled offline fallback using localStorage with sync capability for offline gesture data capture.
- Reference : <https://ai-powered-gesture-detection-62.lovable.app/>

---

## Internship (INFOSYS SPRINGBOARD)

---

- Project: **CIVIX** – Citizen Interaction and Service Platform ([certificate image](#)).
- Developed a web-based platform (CIVIX) that enables citizens to directly connect with higher authorities and local government departments to address their civic concerns or requests.
- Implemented secure user authentication, structured data flow between users and authorities.
